

2016 Golden Cylinder Award Winners for Packaging, Product, Stamp and Label Categories

Packaging and Label- Paper

This winner was printed using water-based Inks. The judges commented on the quality of the images, vignettes and the color balance across the range. The realization of the parchment look and detail was also noted. This unique campaign from the customer was well executed by the printer, who created the sense of randomization for the consumer.

Winner in the Packaging and Label-Paper category for

Pabst Blue Ribbon American Traditions Collection

**Inland
LaCross, WI**

Packaging and Label - Film/Film Lamination

The judges were impressed by the registration, vivid details, unbelievable transitions and one commented that the process work was so well executed – it looks 3D! The extreme screen resolution of the imaging process and the volume delivery of gravure achieved the contrast and subtleties of this design.

Co-winner in the Packaging and Label-Film/Film Lamination category for

Mayonnaise Sloboda

**UKRPLASTIC
Kiyv, Ukraine**

Packaging and Label - Film/Film Lamination

Equally, a very demanding family of designs caught the judges' eyes. Very tight registration and subtle tones were very well executed. The smooth vignettes and fine text were also remarkable; these are great examples of using the gravure process to differentiate high value products from competing options.

Co-winner in the Packaging and Label-Film/Film Lamination category for

Ghirardelli Melting Wafers

**American Packaging Corporation
Columbus, WI**

Packaging and Label-Film-Surface/Reverse Printed

Something new and well executed; top notch, outstanding work on a difficult substrate. The judicious use of process colors and high brilliance silver, creates impactful graphics that are used to dramatic effect, demonstrating the strength of the Gravure process.

Winner in the Packaging and Label-Film-Surface/Reverse Printed for

Philip Morris USA Marlboro Blend 27 Promotional Outerwrap

**Mundet
Surgoinville, TN**

Packaging and Label-Film-Shrink

Superb reproduction of the delicate and complex floral designs, contrasting with vibrant background colors, makes this one a winner! Fluorescent, metallic and pearlescent elements worked together providing a dramatic backdrop to the illustrations, but required first rate registration across up to ten colors.

Winner in the Packaging and Label-Film-Shrink category for

Ultra Downy Family

**Multi-Color Corporation
Batavia, OH**

Packaging and Label-Film-Pressure Sensitive

A deceptively simple design is executed to provide a subtle textural appearance. The silver was engraved using a proprietary high definition/high volume technique from WRE/ColorTech. Brilliantly executed labels developed for a very limited market challenge some of the misconceptions about market scope for gravure.

Winner in the Packaging and Label-Film-Pressure Sensitive category for

Bud Select-Brewed for the Lou

**CCL Label
Clinton, SC**

Packaging and Label- Paperboard/TopCoated

The registration between the micro-embossing and print elements in this classy carton caught the attention of the judges. The printer brought the redesign of this brand to life and exceeded the expectations of their customer – what more can you ask?

Winner in the Packaging and Label-Paperboard/TopCoated category for

Virginia Slims Micro-Embossing

**Ancor Tobacco Packaging
Chester, VA**

Packaging and Label - Corrugated

The judges commented on the clean execution of this piece, good transitions and well executed vignettes. Very well done! ESA enhanced the performance on press and new engraving technology from Ohio enhanced the type.

Winner in the Packaging and Label- Corrugated category for

Pearl 8240938 115ct. Finish PB

**Packaging Corporation of America
Waco, TX**

Product-Decorative Coverings

This product takes on the challenge of rendering pastel shades and beautiful babies and shows how it should be done! The judges found it almost impossible to find a flaw in this example; they particularly admired the flesh tones and text quality – Wow!!!

Winner in the Product-Decorative Coverings category for

Wet wipes for babies

**UKRPLASTIC
Kiyv, Ukraine**

Product-Floorcoverings

This example is designed for exterior use and therefore combines specially formulated inks and specific separation processes that are particularly suited to the gravure process. The illusion of texture and detailed grain structure elevated this entry.

Winner in the Product-Floorcoverings category for

Weathered Grey-Architectural Films

**CCL Design
Schererville, IN**

Product-Functional

Excellent use of the matte and metallic and well balanced illustrations endeared this entry to the judges. Such a well-executed, challenging piece, when you consider the film substrate used and the diverse elements that had to be satisfied. Great Job!

Winner in the Product-Functional category for
Prepress work for "Nestle KitKat Mini Moments"

**Flex Middle East Fze-Graphics, UAE
Dubai, UAE**

Product-Decorative Laminates

The judges felt that this product met all the criteria to win this category in addition to the functional category previously announced.

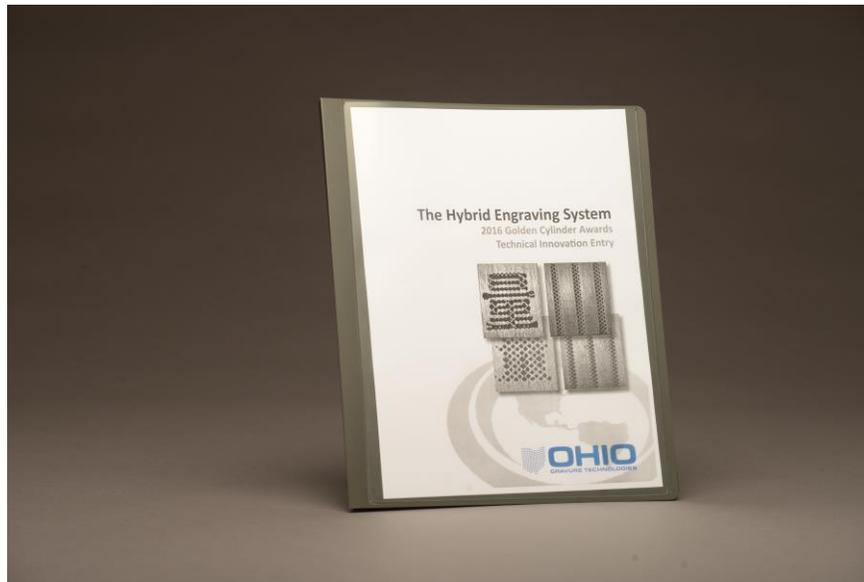

Winner in the Product-Decorative Laminates category for

Weathered Grey-Architectural Films

**CCL Design
Schererville, IN**

Technical Innovation-Image Carrier

Edge integrity is enhanced by this technology, delivering the benefits of chemical etching with the predictability of electromechanical engraving.

Winner in the Technical Innovation-Image Carrier category for

Hybrid Engraving System

**Ohio Gravure Technologies
Miamisburg, OH**

Technical Innovation-Inks & Substrates

The tactile elements impressed the judges and fit well with the embossed elements. Both graphic elements and tactile elements pose their own particular challenges; this entry shows how they can be met and overcome to produce a great pack.

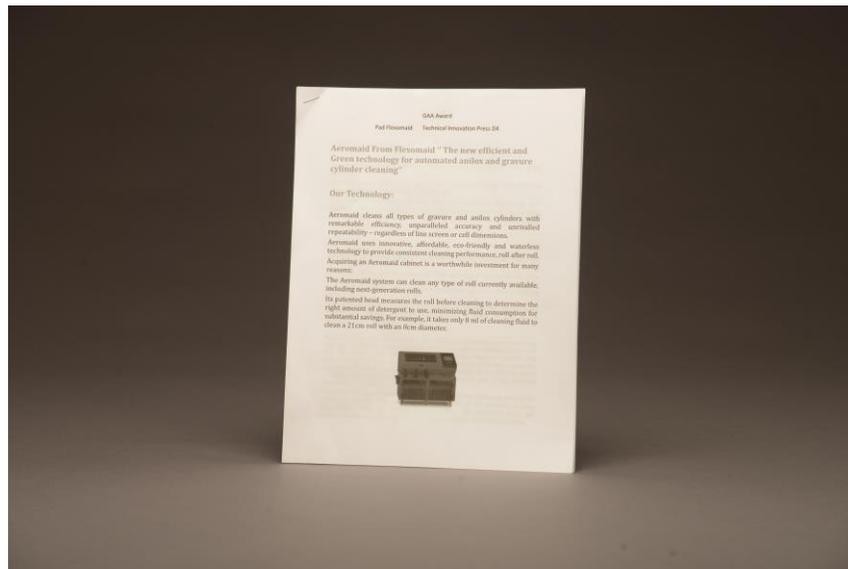

Winner in the Technical Innovation-Inks & Substrates category for

JTI Export A Tactile Ebeam Bevel Hingelid

**Ancor Packaging Richmond
Chester, VA**

Technical Innovation-Post Press

Consideration for the environmental was a factor in this category winner. An effective process with a minimized waste-stream won the admiration of the judges.

Winner in the Technical Innovation-Post Press category for
**Aeromaid: Automated Cleaning Equipment for Gravure and Anilox
Rolls**

**Pad Flexomaid
Quebec, Canada**

Technical Innovation-Packaging

This is an additional technical innovation award for developments achieved in E-Beam application. In this case, gravure is the only process capable of producing the requisite design elements.

Winner in the Technical Innovation-Packaging category for

JTI Export A Tactile Ebeam Bevel Hingelid

**Amcor Packaging Richmond
Chester, VA**

Technical Innovation-Product

A safe, time saving innovation that does not use any chemicals and only human energy – got to be a winner!

Winner in the Technical Innovation-Product category for

Grinding Stone Clamping Unit

SYNTEK Co., LTD.
Yokohama, Japan

Technical Innovation-Label

If you would like to give the world a Coke – it now comes with a bow! This marketing innovation uses the interactive label construction to provide a Holiday novelty.

Winner in the Technical Innovation-Label category for

Coca Cola BOW Labels

**Constantia Flexibles
Mason, OH**

” Best of the Best” Co-Winners

Philip Morris USA Marlboro Blend 27 Promotional Outerwrap

**Mundet Tennessee
Surgoinville, TN**

Wet wipes for babies

**UKRPLASTIC
Kiyv, Ukraine**
